Brainstorming & Idea Prioritization

Solo project assessment • Ideas compared using feasibility, importance, and priority

Date	29 October 2026	**Team / Project Mode**	Individual (Solo Project)
Project Name	CrimeVision AI – Intelligent Multimodal Forensic Analysis Platform	**Maximum Marks**	3 Marks

Step 1: Brainstorm and Idea Listing

As this is an individual project, all candidate ideas were generated and assessed by one project owner. The options below are the five ideas presented for consideration.

S. No.	Project Owner	Idea / Suggestion	Category	Group
1	Individual	**Multimodal Attendance & Engagement Agent** Uses multiple signals to support attendance tracking and engagement insights.	Generative AI	A
2	Individual	**Food Verse AI – Multimodal Food Intelligence Agent** Interprets food-related inputs to provide food intelligence and assistance.	Generative AI	B
3	Individual	**Multimodal Construction Intelligence Platform** Applies multimodal AI to construction-related information and workflows.	Generative AI	C
4	Individual	**CrimeVision AI – Intelligent Multimodal Forensic Analysis Platform** Supports forensic analysis by bringing multiple evidence modalities into one analysis workflow.	Generative AI	D
5	Individual	**Personalized Travel Itinerary Planner** Builds travel plans around a user's preferences and itinerary needs.	Generative AI	E

Step 2: Idea Prioritization

Ratings are qualitative and based on a solo student's ability to build a credible prototype, the usefulness of the problem being addressed, and the potential for a meaningful demonstration. Priority is a comparative judgment, not a guarantee of delivery.

Group	Final Idea	Feasibility	Importance	Priority	Selected
A	Multimodal Attendance & Engagement Agent	Medium	High	2	No
B	Food Verse AI – Multimodal Food Intelligence Agent	Medium	Medium	4	No
C	Multimodal Construction Intelligence Platform	Low–Medium	High	3	No
D	**CrimeVision AI – Intelligent Multimodal Forensic Analysis Platform**	Medium	Very High	1	**YES**
E	Personalized Travel Itinerary Planner	High	Medium	5	No

Final Selection: CrimeVision AI
Selected for its strong real-world relevance, opportunity to demonstrate multimodal analysis, and scope for a focused prototype. The project can be developed incrementally, beginning with a clearly defined evidence type and adding further modalities only when the core workflow is reliable. Any output should be treated as investigative support, not as a definitive determination of guilt.

Note: No team members, team ID, or third-party branding are included because this is a solo project document.
