Project Demo Planning

CrimeVision | Intelligent Multimodal Forensic Analysis Platform

Date	1 November 2026	**Team ID**	To be filled by team
Project Name	CrimeVision	**Document status**	Project-aligned draft

Demo objective: show the current working CrimeVision prototype, explain its architecture, and distinguish demonstrated functionality from planned work. Use only non-sensitive sample media.

Demo Sections

S.No	Demo section	Description	Duration	Responsible
1	Introduction & problem	Explain the need to organize and inspect mixed digital evidence; state the prototype's scope.	2 min	Presenter
2	Architecture overview	Show the browser UI, Flask application, local processing libraries and filesystem outputs.	2 min	Presenter
3	Application walkthrough	Open the local site and show the available case/evidence interface in the current checkout.	2 min	Operator
4	Image analysis	Use a prepared sample image to demonstrate object detection, if the current UI/workflow is operational.	3 min	Operator
5	Media/evidence workflow	Show only audio/video/evidence flows that are working; label incomplete features as partial or planned.	3 min	Operator
6	Limitations & Q&A;	Explain CPU processing, local storage, safety considerations and future improvements.	3 min	Presenter

Demo Flow Summary

Step	Activity	Notes
1	Introduction & problem statement	Describe the forensic-analysis support goal without implying automated conclusions.
2	Solution overview	Explain the Flask-based architecture and local models; mention optional external API use only where configured.
3	Live feature demonstration	Run from the prepared environment; use small sample files; show actual outputs and any errors honestly.
4	Q&A; session	Discuss limitations, data protection, testing and the next development steps.

Preparation checklist: verify the virtual environment; run `python checker.py`; start with `python run.py`; confirm the printed URL; prepare non-sensitive sample files; keep a screenshot or recorded fallback in case live inference is slow. Team members should be filled in before submission.
